TUGBOAT™

A Moppet Video™ favorite. Youngsters love to watch the cartoon-like tugboat captain climb aboard his boat for the exciting trip up the river. The tugboat moves out into the river, and the player takes control. The youngster maneuvers the boat over buoys for points, while attempting to avoid treacherous logs in his path. If the tugboat crashes into a log, the child will see his boat sink slowly into the water.

Each time the tugboat successfully reaches the dam, it signifies the end of one level, and the beginning of an exciting new journey. The tugboat automatically maneuvers itself into the locks of the dam, which fill with water, and release the boat into the next level. Each level gets increasingly more difficult as the river narrows, the number of logs increase, and the tugboat picks up speed. The youngsters delight in pushing the horn button on the control panel which toots the whistle on the tugboat.
